**SP Industries specialized compaction & material handling solutions...**

## Solid waste transfer stations & material recovery processes

SP Industries manufactures maximum density systems for optimized operational and transport efficiency and cost-effectiveness. We offer a wide range of sizes to accommodate volume throughputs from mini collection sites to the largest regional transfer stations — from 100 to 740 cu.yds/hr and load weights from 45 to 335 tons/hr.

### Performance, Durability #1

All our systems are designed for site-specific installation, including:

*We help move waste and recycling material through and out of the facility with a variety of standard cart dumpers and lifts that reach up to 30 ft and handle load capacities to 8000 lbs, or custom dumpers (like the one above, top right photo), that can be designed specific to any size operation*

*3 to 13 cu/yd capacity transfer station compactors tailored to meet specific application and facility requirements*

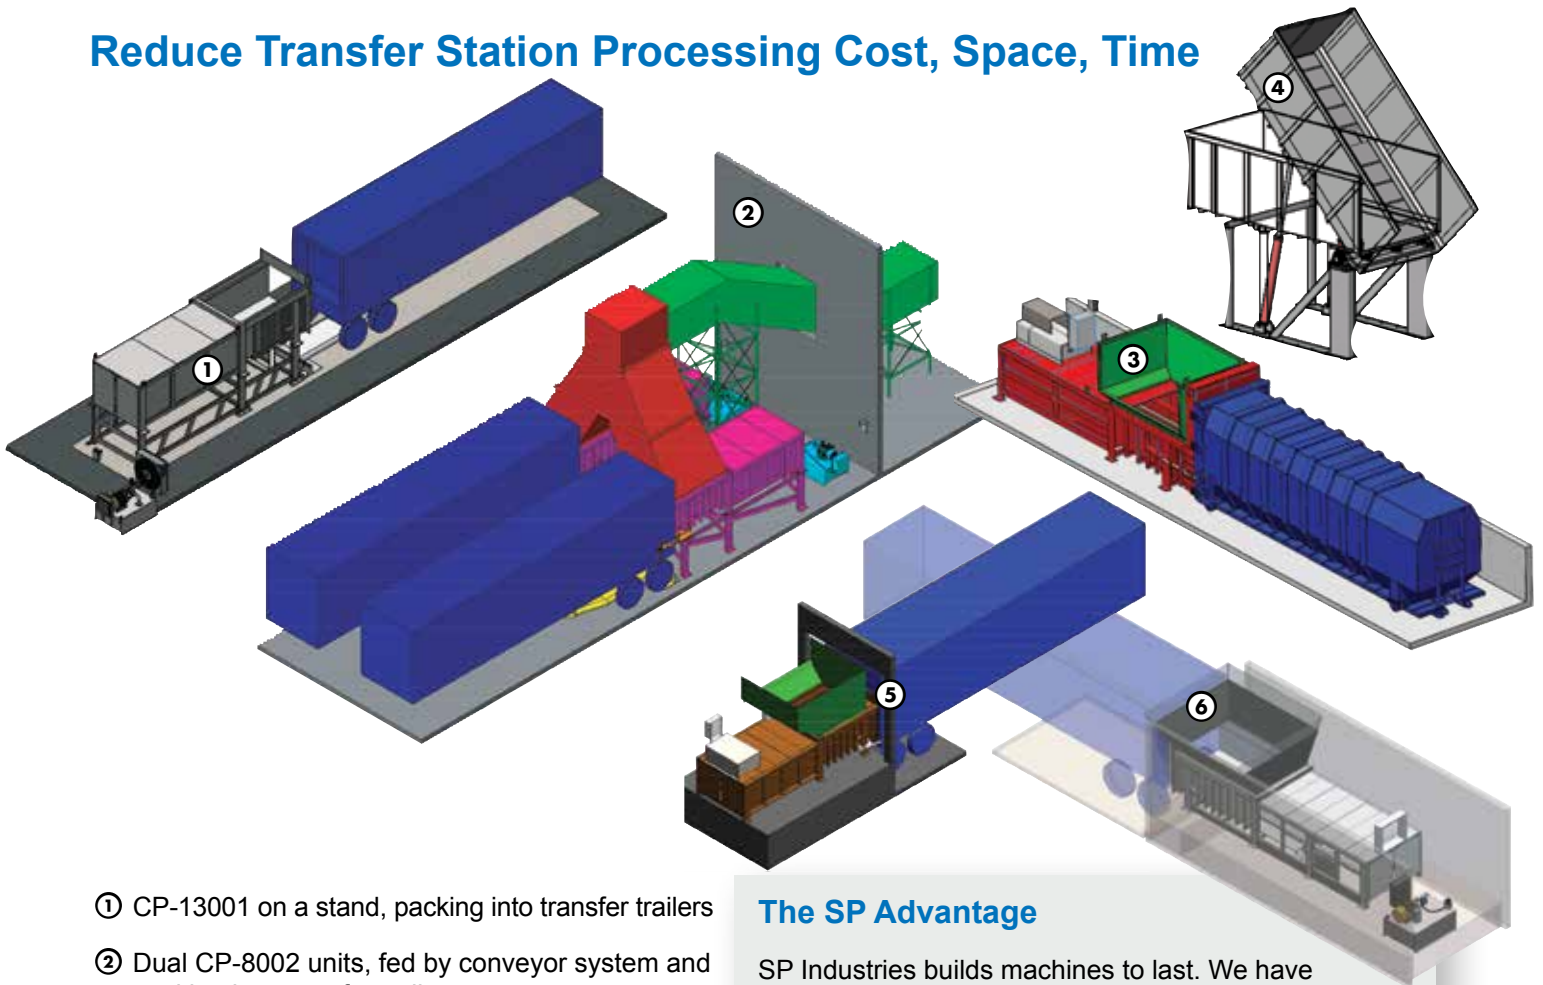

*3 to 9 cu/yd capacity precrusher compactors tailored for extreme compaction requirements and product destruction*

## SP Industries Transfer Station Examples:

### Reduce Transfer Station Processing Cost, Space, Time

- ① CP-13001 on a stand, packing into transfer trailers
- ② Dual CP-8002 units, fed by conveyor system and packing into transfer trailers
- ③ Side-loading hopper PC-7000 precrusher used for product destruction and loading into roll-away containers for safe, secure handling/disposal
- ③ Specially design dumper for a mini transfer station application to empty wastes from mezzanine platform deck into compactor
- ⑤ Transfer station using front end loader to fill side-loading CP-8002
- ⑥ Top-loading CP-9002 located in interior enclosed room beneath loading deck at transfer station facility

#### The SP Advantage

SP Industries builds machines to last. We have a ±30 year history of building performance solutions for industry leading companies in automotive, machining, petrochemical, pharmaceutical, food & beverage, transportation and hospitality.

We design and manufacture a comprehensive standard line of compactors, precrushers, transfer station equipment and cart dumpers to meet small-to-large capacity operations.

- Locally available through nationwide network of factory-trained dealers and distributors
- Nationwide installation and service
- Best-in-industry warranty program

*Our team of application experts are available to assist you to find the best solution to meet your specific application requirements.*

*Please call or email us with your questions. We welcome the opportunity to work with you!*
