

Consideration for “taking out the trash” is never the first item on the facility design agenda — but don’t get boxed in by making it the last.

SP Industries can help make this an easy, best-fit solution in a several ways:

- Comprehensive engineering services from +30 years experience in the industry
- Site-specific Solid Works drawings
- Site visits and expert design consultation
- Turnkey solutions including application/site-specific compactor access and egress including hoppers, decks, containers, specially configured power units, and much more. (Download our 24-page illustrated compactor design guide for comprehensive design configuration ideas.)
- Equipment installation and start-up
- After-the-sale support and service from our nationwide network of factory-trained SP Industries dealerships
- Best-in-industry quality and warranty program
- Pricing strategies to GC for repeat bidding and sale opportunities

We specialize in compaction & material handling equipment solutions to maximize efficiency for wet or dry waste stream/recycling operations

Our team of application experts are available to assist you to find the best solution to meet each of your facility's specific design requirements.

Please call or email us with your questions.

We welcome the opportunity to work with you!

SP Industries has a 30 year history of helping industry leading companies in pharmaceutical, food & beverage, petrochemical, automotive, aviation, machining and metal processing, institutional, hospitality and others move their waste and recycling material through and out of their facilities.

Our line of cart dumper and lift products reach up to 30 ft and handle load capacities to 8000 lbs; our compaction and containment solutions address diverse process requirements, and are readily adapted to facility layout needs with a wide range of user-selected design features and options.

COMPACTORS

PRE-CRUSHERS

CART DUMPERS

MATERIAL LIFTS

FLUID RECOVERY

SEALED SELF-CONTAINED

PRODUCT DESTRUCTION

DRY/WET WASTE CONTAINERS

TRACTOR TRAILER LOADERS

TRAILER RESTRAINT SYSTEMS

TRANSFER STATIONS
